Headline Role:

Professional Summary

Core Skills

Tools and Platforms

- ServiceNow IRM, AuditBoard, Archer, Jira, Confluence, Power BI
- Microsoft Sentinel, Splunk, Microsoft Defender for Endpoint, CrowdStrike
- Okta, Azure AD, AWS IAM, Security Hub, GuardDuty, KMS
- SQL, reporting and evidence management

Certifications

Current: PMP, CISA, CompTIA Security Plus, CISM, CRISC, CCSP

Planned to strengthen GRC, IAM, security operations, and cloud GRC: ISO 27001 Lead Implementer or Lead Auditor, Microsoft SC 300, GIAC GCIH, AWS Certified Security Specialty or AWS Solutions Architect Associate plus AWS Security Specialty, Microsoft AZ 500 or SC 100,

Education

- Master of Science, Information Systems, University of Maryland Global Campus, 2025
- Bachelor of Science, Rutgers University, New Brunswick, New Jersey, 2018

Selected Projects

- Access Review Automation, identity platforms and ticketing workflow, improved approval quality and audit readiness
- Scope: designed workflow for access requests and periodic reviews, included role mining approach, approval logic, and audit trail evidence, delivered a repeatable control with measurable rework reduction potential
- Vulnerability Governance Dashboard, SIEM and reporting platforms, improved visibility into remediation performance
- Scope: built a dashboard model for SLA tracking, prioritization, and leadership reporting, defined metrics and status categories to support risk based decisions and escalations
- ServiceNow IRM Workflow Build, ServiceNow IRM, improved issue ownership and closure discipline
- Scope: configured intake, ownership, evidence collection, and closure criteria, standardized the control evidence process to support audits and faster remediation

Professional Experience

Security Analyst, Blue Cross Blue Shield, Remote, Contract

- Led control testing across 28 HIPAA safeguards focused on access, audit logging, and evidence quality, improving compliance confidence and governance reporting
- Owned remediation coordination and evidence validation, lowering mean time to remediate from 45 days to 20 days through clearer requirements and follow up

Workday Security Analyst and ITGC Controls, Amazon, Arlington, Long Term Contract

- Reduced privileged assignments by 32 percent and improved access approval first pass rate from 68 percent to 92 percent by tightening governance and review criteria
- Designed access governance practices across Workday roles and ITGC evidence, partnering with stakeholders to resolve control gaps and sustain compliance

Project Manager and GRC Analyst, Equitable, Jersey City, 3 year Contract

- Built issue and risk workflows in ServiceNow IRM, improving on time task completion to 86 percent and reducing average time to closure by 18 days
- Owned SOX 404 and ITGC testing across 8 in scope applications and 90 samples, closing 12 issues before external testing and supporting audit readiness
- Delivered 20 weekly leadership status reports and verified remediation through retesting of 22 issues with 100 percent acceptance

Additional Experience

- Business systems analysis and program coordination across finance, operations, and technology teams, supporting governance, change delivery, and compliance alignment

Portfolio

Portfolio link: add a single URL to a folder or site with sanitized artifacts that demonstrate ownership.

- Controls matrix example aligned to NIST or ISO, with evidence requirements
- Risk register template and scoring rubric, including issue management workflow
- Sample vulnerability governance dashboard screenshots and KPI definitions
- Sample incident response plan outline and lessons learned template
